August 2-3	Saskatchewan Agriculture Hall of Fame Inductions	Saskatoon, SK	1-306-931-4056	www.sahf.ca

HAY SALVAGE DEADLINES

by the Saskatchewan Ministry of Highways and Infrastructure

Farmers and ranchers wanting to bale hay near provincial highways should remember some important deadlines and guidelines before salvaging the material.

A landowner, lessee or their designate has first option to cut and bale the hay or grass in highway ditches and medians (which are also known as the provincial highway right-of-way) until July 8. After July 8, anyone may salvage this material without contacting or getting the permission of the landowner, providing the landowner hasn't started to harvest.

Non-adjacent landowners or lessees who want to harvest roadside hay prior to July 8 are encouraged to contact the adjacent landowner or lessee and make arrangements to become their designate.

Normal median areas on four-lane highways will be divided equally between adjacent landowners or lessees. The large median areas (near interchanges and weigh scales) shall be leased by means of a tender process.

The hay must be cut at a uniform height leaving a neat appearance. Bales of hay must be at least eight metres from the edge of the shoulder of the highway. All bales must be removed from the highway right-of-way by August 8.

To minimize hazards to the travelling public, bales that are not removed by August 8 or are too close to the shoulder may be removed by Saskatchewan Ministry of Highways and Infrastructure.

Mowing may take place in certain areas prior to July 8, as required for control of noxious weeds, safety and aesthetics. These deadlines and guidelines are designed to give everyone an equal opportunity to harvest the material from Crown land.
